1 Problem Statement

Drivers driving their cars into Makerere University usually find a big problem aligning with Makerere University's new traffic flow system. This is due to the fact that payment booths are far away from the entrances they use and most times away from parking lots they want to use creating an inconvenience in their schedules and also tends to be time consuming.

2 Data to be collected

The location of some parking spaces around the university and the approximate number of vehicles each can hold.

The number of payment booths in the university plus their location.

The highest and lowest prices one has to pay in order to be able to park their car in Makerere University that is 500shs and 3000shs respectively

The times at which the Parking System for Public Cars in the University starts and stops working that is 8am and 10pm respectively.

Pictorial evidence of the Parking bays and a parking bay.
